MATHAN PONRAJ

Python AI Developer | Data Analyst | Seeking Python Developer Role in Bangalore | Immediate Joiner

Bangalore, Karnataka | 7339404085 | mathanponraj03@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Python AI and backend developer based in Bangalore with hands-on experience building REST APIs with FastAPI, GenAI and RAG applications with LangChain, and ETL data pipelines. Has taken 3+ projects from raw data to live deployment. Immediate joiner seeking a full-time Python Developer role in Bangalore.

TECHNICAL SKILLS

AI & LLM: LangChain, RAG, OpenAI & Gemini APIs, Prompt Engineering, Hugging Face, ChromaDB, AI Agents

Backend: Python, FastAPI, Flask, REST APIs, SQL, PostgreSQL, SQLite, Git, GitHub, Postman

Frontend: HTML, CSS, JavaScript, React.js

Data & ML: Pandas, NumPy, Scikit-learn, XGBoost, Feature Engineering, ETL, Star Schema, Power BI, Excel

Deployment: Render, Vercel

PROFESSIONAL EXPERIENCE

Freelance Developer & Team Lead **Ongoing (1+ year)**

- Lead a 3-member technical team building web applications that combine backend engineering and AI.
- Built and deployed static and dynamic web pages; completed and hosted 3+ live production applications.
- Handled end-to-end Instagram content creation, including professional video editing and Photoshop design.

Data Science Intern | Rinex.ai **Mar 2025 – May 2025**

PROJECTS

TalentIQ AI | Python, FastAPI, LangChain, RAG, React.js, Gemini API GitHub | Live Demo

- Built a GenAI career-prep app that analyses an uploaded resume against a target role to surface skill gaps and suggest resume improvements using NLP.
- Developed the FastAPI backend and a LangChain RAG pipeline with semantic chunking so related skills stay together in embeddings; added mock interviews at multiple difficulty levels.

TrendTube – YouTube Trending Pipeline | Python, PostgreSQL, ETL, Pandas GitHub

- Built a Python ETL pipeline that pulls trending videos across 9 regions from the YouTube Data API, cleans and validates them with Pandas, and loads them into PostgreSQL.
- Designed a star schema (dim_video, dim_region, dim_date, fact_trending) and an engagement metric to compare regional trends with plain SQL.

EduHelpDesk – Ticketing System | Python, Flask, SQLite, REST APIs, RBAC GitHub | Live Demo

- Developed a role-based ticketing platform where students raise tickets, staff resolve them and managers track progress on separate dashboards; deployed on Render.
- Implemented SLA tracking that measures ticket age against deadlines, flags overdue cases and keeps a full history of every status change.

LapPick – Laptop Price & Recommender | Python, XGBoost, Scikit-learn, Streamlit GitHub | Live Demo

- Trained an XGBoost model on about 1,300 laptop listings to predict price from specifications ($R^2 \approx 0.91$) after outlier cleaning and category encoding in a Scikit-learn pipeline.
- Built a Streamlit app that recommends laptops by budget, RAM, CPU and storage filters.

EDUCATION

M.E. in Computer Science & Engineering **2024 – 2026**

Karpagam Academy of Higher Education, Coimbatore | First Class

B.E. in Computer Science & Engineering **2020 – 2024**

Government College of Engineering, Bodinayakkanur | First Class

CERTIFICATIONS

- Data Science and Machine Learning using Python
- Deloitte Virtual Data Analytics Internship
- Advanced SQL and Excel for Data Analysis
- Python Programming
